This Hot Fix contains a fix for the defect described below.

Description:

It is possible for a user to re-enter SDD without entering credentials by navigating backward or forward in the browser.

Resolution:

When a user logs out of SDD, the user credentials are deleted. If a user tries to access SDD in any manner including, navigating via the back or forward browser buttons or selecting a historical path in the history drop down, the user will be prompted to re-enter their credentials.
