

# INSTALLATION INSTRUCTIONS FOR HOT FIX 64ABM03 ON WINDOWS

## BEFORE DOWNLOADING:

The hot fix 64ABM03 addresses the issue(s) in SAS Activity-Based Management 6.4 software on Windows as documented in the "Issue(s) Addressed" section of the hot fix download page:

[http://ftp.sas.com/techsup/download/hotfix/nls\\_op\\_zh.html#64abm03](http://ftp.sas.com/techsup/download/hotfix/nls_op_zh.html#64abm03)

## IMPORTANT NOTE(S):

1. You must have SAS 9.1.3 Service Pack 4 and SAS Activity-Based Management 6.4 installed on your system before applying this hot fix.
2. You must have Administrator Privileges on your CLIENT or SERVER machine and all currently active SAS sessions must be terminated before applying this hot fix.

## INSTALLATION:

The hot fix package downloaded is a zip file named **ABM6.4SimplifiedChineseHelp.zip**.

1. Prior to installing this hot fix, verify that the language pack has been installed. If the language pack is installed:

- a Language choice selection appears at the bottom of the ABM logon screen
- a language folder in addition to "en" will exist in the

*<Drive>:\Program Files\Common Files\SAS\Activity-Based Management\resources*

folder. For example:

*<Drive>:\Program Files\Common Files\SAS\Activity-Based Management\resources\zh-CN*  
*<Drive>:\Program Files\Common Files\SAS\Activity-Based Management\resources\en*

If the language pack has not been installed, the following actions **must** be performed:

- a. Run the LanguagePackInstaller.exe on your SAS Activity-Based Management Server and select a language pack to install.

This step should be executed once for your SAS Activity-Based Management Server.

- b. For each client that wants to install the language pack, access the SAS Activity-Based Management Product home page, select "Install Language Pack" (under Downloads), and then click on the appropriate Language Pack installation.

This step should be executed for each SAS Activity-Based Management client prior to applying this hot fix.

2. After the Language Pack has been installed on your SAS Activity-Based Management client machine as stated in *Step #1*, unzip the contents of **ABM6.4SimplifiedChineseHelp.zip** to

*<Drive>:\Program Files\Common Files\SAS\Activity-Based Management\resources\zh-CN\help*

This will update the compiled HTML localization help files for the SAS Activity-Based Management client.

3. You must unzip **ABM6.4SimplifiedChineseHelp.zip** for each SAS Activity-Based Management client for which you want to update localization help.

**This completes the installation of hot fix 64ABM03 on Windows.**
