

INSTALLATION INSTRUCTIONS FOR HOT FIX 32ROM603 ON AIX 64BIT

BEFORE DOWNLOADING:

The hot fix 32ROM603 addresses the issue(s) in 3.2 of SAS Merchandise Intelligence software on AIX 64BIT as documented in following issue:

<http://tsdsrv05.unx.sas.com:7777/iw/docs/sasnotes/fusion/42/714.html>

IMPORTANT NOTE(S):

1. You must have SAS Merchandise Intelligence 3.2 installed on your system and hot fix 32RO06 must already be applied before applying this hot fix.
2. You must deploy the hot fix in the following timeframe
 - a. after your weekly activity has completed
 - b. before the weekly ETL and back-end job
3. The hotfix must be installed using the same userid that performed the initial SAS Merchandise Intelligence 3.2 installation.
4. You must have Administrator Privileges on your CLIENT or SERVER machine.
5. All currently active SAS sessions, daemons, spawners and servers must be terminated before applying this hot fix.

INSTALLING THIS HOT FIX:

1. Technical Support strongly suggests that you back up the files being replaced by this hot fix. You should always try to include the current date in the name of the backup file created to distinguish between versions of backup files. By doing this you will maintain a history of the file, which will be helpful when multiple iterations of a hot fix have been applied to the same file.

For example,

```
cp sas.foo.jar sas.foo.exe.04132011
```

where 04132011 is the date when the hot fix is applied.

The .<date> extension MUST be appended AFTER the .exe extension as it appears above.

FILE INFORMATION:

The hot fix package that is downloaded is in tar format. The name of the tar file is 32rom603r6.tar, and it contains the following updated files:

- * sasmdo
the replacement executable containing the hot fix

INSTALLATION STEPS:

1. Back up the existing version of all the files before extracting the contents of this hot fix package.
2. Extract 32rom603r6.tar into a temporary directory. For example,
 - > cd /tmp
 - > tar -xvf 32rom603r6.tar
3. Update the installation history file. Use the following commands to execute the script that updates the hot fix install history file. You *must* execute this script from the !SASROOT directory.
 - \$> cd <!SASROOT>
 - \$> install/admin/hotfix/histupd_32rom603

This completes the installation of hotfix 32ROM603 on AIX 64BIT.
