INSTALLATION INSTRUCTIONS FOR HOT FIX F9WB01 ON WINDOWS FOR IPF

BEFORE DOWNLOADING:

Hot fix F9WB01 addresses the issue(s) in SAS 9.2 (9.2 TS1M0)
of SAS/IntrNet software on Windows for IPF as documented in the
"Issue(s) Addressed" section of the hot fix download page:

http://ftp.sas.com/techsup/download/hotfix/f9_sbcs_prod_list.html#f9wb01

IMPORTANT NOTE(S):

1. You must have Administrator Privileges on your CLIENT or SERVER machine.

2. All currently active SAS sessions, daemons, spawners and servers must
     be terminated before applying this hot fix.

AFTER DOWNLOADING:

The hot fix package downloaded is a self extracting executable named
f9wb01w6.exe. Launching the executable will extract the contents to a folder
named 'C:\F9WB01'. The following file will be extracted:

    * htmSQL.exe

To make this file available to your web server:

1. Back up the current version of htmSQL.exe in your web server's cgi directory.

2. Copy the htmSQL.exe file from C:\F9WB01 to your web server's cgi directory.

This completes the installation of hot fix F9WB01 on Windows for IPF.
