Instructions for Hot Fix 521WA01 on HPUX for ITANIUM

The hot fix package downloaded is a tar file named 521wa01hx.tar.

IMPORTANT NOTE(S):

1. You must have SAS Web Analytics 5.2.1 installed on your system
    before applying this hot fix.

2. The hot fix must be installed using the same userid who performed the
    initial SAS 9.1.3 installation.

3. You must have Administrator Privileges on your CLIENT or SERVER machine.

4. All currently active SAS sessions, daemons, spawners and servers must
    be terminated before applying this hot fix.

5. For example purposes, in these instructions the directory where SAS Web
    Analytics is installed is:

        /usr/local/SAS913

Installing 521wa01hx.tar

1. Back up the files to be replaced before extracting the contents of the
tar file 521wa01hx.tar

The file installed includes:

        !SASROOT/sasautos/waetl.sas

2. Extract the contents of the downloaded tar file into the !SASROOT directory.
In the following example the downloaded tar file is located in the installer's
$HOME directory.

** The tar command MUST be executed from the !SASROOT directory
** in order for the updated files to be installed to the proper location.

        $> cd /usr/local/SAS913

        $> tar –xf $HOME/521wa01hx.tar

3. Execute the script that will update the hot fix installation history file.
This script MUST be executed from the !SASROOT directory.

        $> pwd

```
    /usr/local/SAS913

    $> install/admin/hotfix/histupd_521wa01
```

This completes the installation of hot fix 521wa01.
